WELCOME TO A SEMINAR ON

‘Values’ at the intersection of nature and society

As general reasoning would have it, in order to include ‘nature’ in decision-making, the functions or services of that ‘nature’ need to be assigned a value in order to be counted. But exactly what is to be valued, how to assign value and by which societal instruments value is allotted are all questions that need further discussion.

Date: 5th of December 2019
Time: 15.00–16.00
Place: Pangea, Geocentrum II, Lund

Register before December 2nd:
Email cheryl.sjostrom@cec.lu.se

THE FORMAT
Each joint seminar consists of a panel of three current PhD candidates. Presenters speak briefly on an aspect of their research that relates to the seminar topic. This is followed by a panel discussion between the three presenters, supported by a moderator. Coffee/tea and a sandwich are offered to registered participants.

PROGRAMME
Introduction from seminar convenors
Cheryl Sjöström (ClimBEco), George Neville (LUCSUS)

Social values within the ecosystem services paradigm
Sanna Stålhammar (LUCSUS)

Cost-effective nature conservation in food production
William Sidemo Holm (CEC)

Value-making in circular economy through policy instruments
Jessika Luth Richter (IIIEE)

ABOUT THE SEMINARS
Our seminars on environmental challenges are by and for PhD candidates at Lund University, primarily directed towards PhDs of Sustainability Science at LUCSUS, the PhD program in Environmental Science at CEC, PhDs of Environmental Economics at IIIEE and members of the research school ClimBEco. It is a joint initiative by ClimBEco, LUCSUS, IIIEE and CEC.

PhD candidates from other faculties and departments at Lund University, as well as advanced master-level student are welcome to attend as space allows.

This joint seminar series aims to be an intellectual meeting place for PhD candidates to discuss in a peer-to-peer setting around topics that many can relate to, albeit from different angles of vision. The goal is NOT to reach consensus, but to explore where similarities and differences exist with the goal of expanding networks within the research community of PhD candidates at Lund University.
